

Gas Chromatography Columns

Introduction:

Cross GC columns are designed to provide superior performance and versatility for a wide range of gas chromatography applications. Known for their innovative designs and reliable separation capabilities. Cross GC columns are a preferred choice for laboratories focused on achieving the highest levels of precision and productivity.

These columns are engineered to meet the demanding requirements of both routine and high-end applications, ensuring reproducibility, sensitivity, and robust performance across various industries.

Industries Served:

Pharmaceuticals	Food and Beverage	Perfumes and Cosmetics
Forensic Science	Chemicals and Materials	Agriculture
Petroleum Industry	Biotechnology	Healthcare and Diagnostics

Cross Reference Table GC Columns

Rsolv	Agilent	Restek	Phenomenex	Thermo Fisher Scientific	Merck/Supelco	Perkin Elmer	GL Sciences
USP Code - G1 / G2, Phase - 100% Dimethylpolysiloxane / Dimethylpolysiloxane gum
